## A Message From Town Supervisor **JOHN VENDITTO**

Dear Genealogy Enthusiast,

In recent years, genealogy has become one of the world's most popular hobbies. Countless people around the world are actively engaged in some form of family research. Whether it's to satisfy a curiosity about oneself, provide children with a sense of who their ancestors were or to compile a medical history, people are trying to get in touch with their roots.

Cemeteries are an important research tool for many people delving into genealogy. Inscriptions on gravestones can be a significant source of genealogical information, but locating cemeteries, especially older ones, is not always easy. This booklet was developed to help those engaged in genealogical research in locating the old cemeteries. It lists historical cemeteries in the Town of Oyster Bay, along with the transcription records for those cemeteries.

Careless hobbyists, vandalism and deterioration with age have taken a heavy toll on these historic cemeteries. If you do visit a cemetery, please be quiet and respectful while in the cemetery and try not to walk on graves.

I hope you find this booklet interesting and helpful as you "climb" your family tree.

Very truly yours,

**JOHN VENDITTO**  
Town Supervisor

## **A Guide to their Locations and Sources of Transcription Information**

**Researched and compiled by John E. Hammond, Town Historian**

First Printing February 2007

### **Introduction**

For the historian and genealogist, cemeteries are vast repositories of information about the past. Within the pre-1920 boundaries of the Town of Oyster Bay are located some of the very oldest cemeteries to be found anywhere in New York State. The earliest cemeteries were small family plots such as the Townsend or Mill Hill cemetery located just to the west of the Mill Pond in Oyster Bay. This was a family burial plot for Henry Townsend, who built the first mill in Oyster Bay in 1661 and was buried on his own property. In nearby Oyster Bay Cove, the Youngs family set aside a plot of their own land for a family burying place in 1658. Today, this family burying plot also contains the grave of Theodore Roosevelt, 26<sup>th</sup> President of the United States. Various church groups began cemeteries in the later part of the 17<sup>th</sup> century, the earliest being the Friends, who set aside a cemetery on the west side of South Street in Oyster Bay in 1672.

Interest in the documentation of the early burials within the Town goes back to the 1800s when some historians and family researchers began recording the inscriptions on the stones in some of the very oldest cemeteries. Samuel Youngs wrote about the difficulty finding the gravestones of the earliest settlers of Oyster Bay and many had disappeared even by the early 1800s; whether Samuel Youngs made any transcriptions is unknown. He, no doubt, was feeling some frustration even then as revealed in a short verse he wrote in the early 1800s;

***“Where are the stones that mark the bones  
Of those who die in Oyster Bay?  
There are no stones to mark the bones  
Of those who die in Oyster Bay.”***

The earliest surviving records of cemetery transcriptions is entitled “Oldest Inscriptions in Burial Grounds in this Vicinity” by Jacob T. Bowne. Bowne’s 1867 record covered a few cemeteries in the Glen Cove area. These efforts were followed by many researchers in the latter part of the 19<sup>th</sup> century. Most notable of these later researchers was Josephine Frost, who compiled information previously gathered by William Wyckoff on cemeteries throughout Long Island.

Over the years, many headstones have disappeared from the old cemeteries; some were used in building foundations, as door stoops, and for walkways. During the Revolutionary War, Hessian and British soldiers reportedly desecrated many local graves and took headstones to use for various purposes. Many family cemeteries simply disappeared, while some were removed to larger public cemeteries. Many remaining gravestones have deteriorated so much that they are now completely unreadable. Unfortunately, in many cases, the transcription records made by those early historians and family researchers are now all that remain.

## **Purpose of This Guide**

The purpose of this guide to **Historic Cemeteries of Oyster Bay** is to be of assistance to genealogical and historical researchers in determining the locations of the historic cemeteries within the pre-1920 boundaries of the Town of Oyster Bay and to serve as a guide to where transcription records can be found. The guide includes all known cemeteries that have ever existed within the Town of Oyster Bay. Although 23 of the cemeteries listed in this guide no longer exist, several individuals in the distant and not so distant past had the foresight to record the information that was then still present. Some records exist as the direct result of WPA projects during the 1930s. As one peruses the various sets of transcriptions beginning in the nineteenth century and up through those completed in the 1960s by Town of Oyster Bay Historian Herbert Hale, the ravages of time on the old stone inscriptions become clearly evident.

This guide does not suggest, nor does it encourage, visits for information gathering purposes to any of the historic cemeteries listed within it. Whatever information remains on the surviving stones is clearly much less than what was transcribed years ago and the sources for obtaining those transcription records are included within this guide.

## **Usage of this guide**

The cemeteries listed within this guide are arranged first by present day locality and then alphabetically by the most commonly known name of the cemetery; also included is a listing of all known names of the cemeteries. The names and descriptions of the locations were taken from the old transcription records; in some cases, the points of reference no longer exist. At least one transcription record is listed for each named cemetery and, in many cases, there are multiple records. Some of the cemeteries contained in this guide are still active; researchers seeking information relative to active cemeteries should be able to find inscription information by contacting those cemeteries.

## Inscription Records

Various individuals and organizations have made transcriptions of cemetery inscriptions. All of the following references are in manuscript form and have not been previously published. In several cases these manuscripts are all that remain.

**DAR**-Jennie W. Van Brunt and Annie James of the Daughters of the American Revolution in Oyster Bay transcribed cemetery inscriptions in 1941 and in 1950. Copies of these manuscripts are available at Raynham Hall Museum, West Main Street, Oyster Bay; the Oyster Bay Historical Society; New York State Library, Albany, NY; New York Public Library, New York, NY; DAR Library, Washington, DC; online-Family History Library, Genealogical Society of Utah.

**Eardeley**-William A. Eardeley of Brooklyn, New York copied gravestones in Bethpage and Farmingdale between 1894 and 1898. His records were printed in manuscript form in April 1918 entitled *Three Cemeteries 1832-1898*, copy is at Queens Borough Public Library. Eardeley appears to have combined the three adjacent cemeteries along Quaker Meeting House Road into one listing.

**Frost** 1912-Josephine Frost typed transcripts from manuscripts in the possession of William F. Wyckoff who employed a young man to complete the project in about 1902. These were compiled in a document entitled *Long Island Cemetery Inscriptions*, Josephine C. Frost, Queens Borough Public Library. Copy also at NYG&B. Online-Family History Library, Genealogical Society of Utah.

**Historical Society of the Massapeguas**-Complete transcriptions of all stones within the Jones Family Cemetery and the Floyd-Jones Cemetery in Massapequa were done in 1994. All stones were also photographed and placed within binders. P.O. Box 211, 4755 Merrick Road, Massapequa, NY 11758-0211.

**Kassner**-Douglas Baker Kassner completed *A Listing of Gravestones in the Old Section of the Locust Valley Cemetery* in 1993. Copy at the Oyster Bay Historical Society.

**Lippert**-In 1994 Mary Jane Layton Lippert completed a detailed survey of the old section of the Brookville Cemetery, this was expanded the following year. In 1999 *A Study of Youngs Memorial Cemetery* was completed using inscriptions and records. Copy at Oyster Bay Historical Society.

**Meigs-Nassau County Cemeteries**, 1938; Long Island Collection, Queens Borough Public Library; copy also at NYG&B, New York.

**Sea Cliff Village Museum**-Sea Cliff, NY 11579, information on Sea Cliff cemeteries and local Indian burial sites.

**TOB**- Town of Oyster Bay Historian Herbert Hale led a project in 1961-1963 to identify and transcribe all known cemetery inscriptions within the Town of Oyster Bay including the Incorporated Village areas. These manuscripts are available at the Oyster Bay Historical Society and through the office of the Town Historian.

**Jacob T. A copy of the booklet is available through the Genealogical Society of Utah on film No 17128 item 29 and No 17680 item 2.

**John H. Jones**-Transcripts entitled *Inscriptions From 32 Cemeteries in Nassau, Queens and Suffolk Counties, New York*. These inscriptions were hand copied in 1896 by John H. Jones, author of *The Jones Family* and contain four parts of 100 pages each. These records are fragile and have not been photocopied or otherwise duplicated. They are available only at the NYG&B.

**Oyster Bay Town Records**-Although burials were not regularly recorded as a part of the Town Records there is some documentation that tells of cemeteries and burials; i.e. Richard Butler's sale of property to Jacob Wright in 1726 mentions "a burying place where his father & mother Now lyes" referring to the Quaker Burial Ground in Oyster Bay. The 8 Volume printed Oyster Bay Town Records are available in most local public libraries. Copies can also be purchased at the Oyster Bay Town Clerk's Office.

## Cemetery Index

The **Cemetery Index** contains several thousand alphabetical listings taken from the DAR, Eardeley, Frost, TOB and other transcription records. The index includes the surname, given name, year of death and cemetery number where the person is buried. In some cases more than one cemetery is listed for a given individual. This is due to the removal of the remains to another cemetery and in a few cases to even a third cemetery. Records for each of those cemeteries should be researched.

Using the cemetery number the researcher can refer back to the cemetery listing section to find the transcription source document and where the record can be located. Transcription documents often contain much more information than just the name of the individual and date of death. Frequently there is mention of the name of the parents, children or marital relationships. When "(Inf)" is listed after a name it indicates an infant death. Maiden names when known or mentioned in the transcriptions are recorded in the cemetery index in parentheses.
